

History Timeline

NT AGRICULTURE IN TIME

Kimak AŞ is founded. Specialized in designing chemistry equipments, Kimak quickly becomes a leading exporter of industrial machines. It also designs and builds factories in and out of Turkey.

Kimak AŞ

1978

Due to inefficient planning and management, the starch factory came to the brink of failure in only two years. Osmanbey Cooperative contacted Kimak for help. Kimak took over the starch factory and created a new branch named **Nişsan Nişasta** to run the factory until the year 2000.

Taking Over the Factory

1985

1987

Starch Factory in Akyazı

The corn producers in the town of Akyazı, Sakarya came together and founded Osmanbey Development Cooperative. The starch factory of the cooperative was built by Kimak and it was highly supported by the government

NT Agriculture

Nişsan Nişasta quickly brought the factory back to life with a final product so fine that it was competing with international brands. In 1994, although the company was very successful individually, Turkish economy was in a crisis. One of the international rivals saw this as a chance to cut Nişsan out of competition and so bought Nişsan's rights from the Osmanbey Cooperative. Nişsan decided to buy corn from the farmers in order to provide raw material to starch factories and hence the company became Nişsan Tarım – NT Agriculture.

1994

1999

A devastating earthquake of magnitude 7.4 hit Turkey. Kimak and NT Agriculture premises were deeply affected and the stress caused by both the disaster and the aftermath in economy ended the partnership of the 4 founders. H. Doğan Cenker took the rights of both Kimak AŞ and NT Agriculture

Expansion: Ferizli Facilities

H. Doğan Cenker kept NT Agriculture and Kimak alive although numerous major and minor crisis continued to sweep Turkish economy. He successfully continued to keep and grow the company's name as a brand in experience and quality. Due to the increase in demand for NT Agriculture's services, NT Agriculture opened up a second facility in the Ferizli Organized Industrial Site.

NOW

NT Agriculture has two corn drying facilities with a combined drying capacity of **2280 ton/day**. This capacity makes it one of the biggest drying facilities in Turkey. NT Agriculture is now expanding its portfolio with the famous **Turkish hazelnuts**.
